About Us

Built on a 50+ year legacy of providing safety, quality, and innovation, UniversalPegasus International (UPI), a subsidiary of Huntington Ingalls Industries (HII), is a leading provider of engineering, project management and field services to the global onshore and offshore energy markets.

Formed in 2008, UPI combined the resources and talent of the engineering and project services companies Universal Ensco and Pegasus International. From its founding in 1961, Universal Ensco grew into the largest onshore pipeline-engineering firm in the western hemisphere. Pegasus International, formed in 1981, developed into one of the world’s foremost offshore engineering and project management firms. In 2010, UPI acquired Integrated Pipelines Projects in Canada, a leading pipeline design firm, to solidify its North American presence.

Today, UPI is heavily involved in upstream oil and gas developments worldwide. This includes design of oil and gas production facilities including conventional production, shale production, and enhanced oil recovery engineering projects. UPI is also a global industry leader in cutting edge subsea development, offshore life of field planning, deepwater tiebacks, and brownfield life of field extension projects.

UniversalPegasus’ Global Services

With its broad client base, UPI provides the following services around the world:

- FEED/feasibility and economic studies
- Engineering and design
- Program and project management
- Procurement Services
- GIS/geospatial services/geomatics services
- Survey
- Inspection
- Operation and maintenance support
- Construction management
- Commissioning and start-up

UPI is headquartered in Houston, Texas and delivers work globally from its offices in the US, Canada, the United Kingdom and Trinidad and Tobago. UPI has performed work in over twenty (20) countries around the world.

A Part of Huntington Ingalls Industries

UPI is a global project delivery firm that provides a broad range of project management, engineering, design, survey, inspection, and construction management services focused on the gathering, transmission and processing of hydrocarbons and hydrocarbon based products both onshore and offshore to global markets. Huntington Ingalls Industries designs, builds and manages the life-cycle of the most complex nuclear and conventionally-powered ships for the U.S. Navy and Coast Guard. For more than a century, HII’s Newport News
and Ingalls shipbuilding divisions in Virginia and Mississippi have built more ships in more ship classes than any other U.S. naval shipbuilder. HII also provides engineering and project management services expertise to the commercial energy industry, the Department of Energy and other government customers. Headquartered in Newport News, Virginia, HII employs more than 39,000 people operating both domestically and internationally.
